PROJECTS

Virtual-Assistant 🔗

- Built a full-stack voice-enabled Virtual Assistant using the MERN stack with secure JWT authentication.
- Integrated Gemini AI APIs for intelligent query handling and real-time voice interaction.
- Designed a responsive, modern UI/UX to ensure seamless user engagement across devices.
- Completed end-to-end development and deployed on Render for live project access.

Clothing E-commerce Website 🔗

- Developed a responsive full-stack shopping platform ensuring seamless browsing and purchasing experiences.
- Utilized React.js and Tailwind CSS for a visually appealing and user-friendly frontend experience.
- Built a robust backend using Node.js and Express.js with MongoDB for scalable and reliable data storage.
- Integrated Razorpay, Stripe, and Cash on Delivery payment methods, and deployed the project on Vercel.

My Portfolio 🔗

- Designed and developed a personal portfolio website using React and modern frontend technologies.
- Showcases projects, skills, and certificate with a clean, responsive, and interactive UI.
- Implemented reusable components and modular structure for maintainability.
- Added sections like About, Projects, Skills, and Contact to present information effectively.
